

We have been designing ground-breaking, world-class loudspeakers since 1998, constantly pushing the limits of convention and challenging the status-quo.

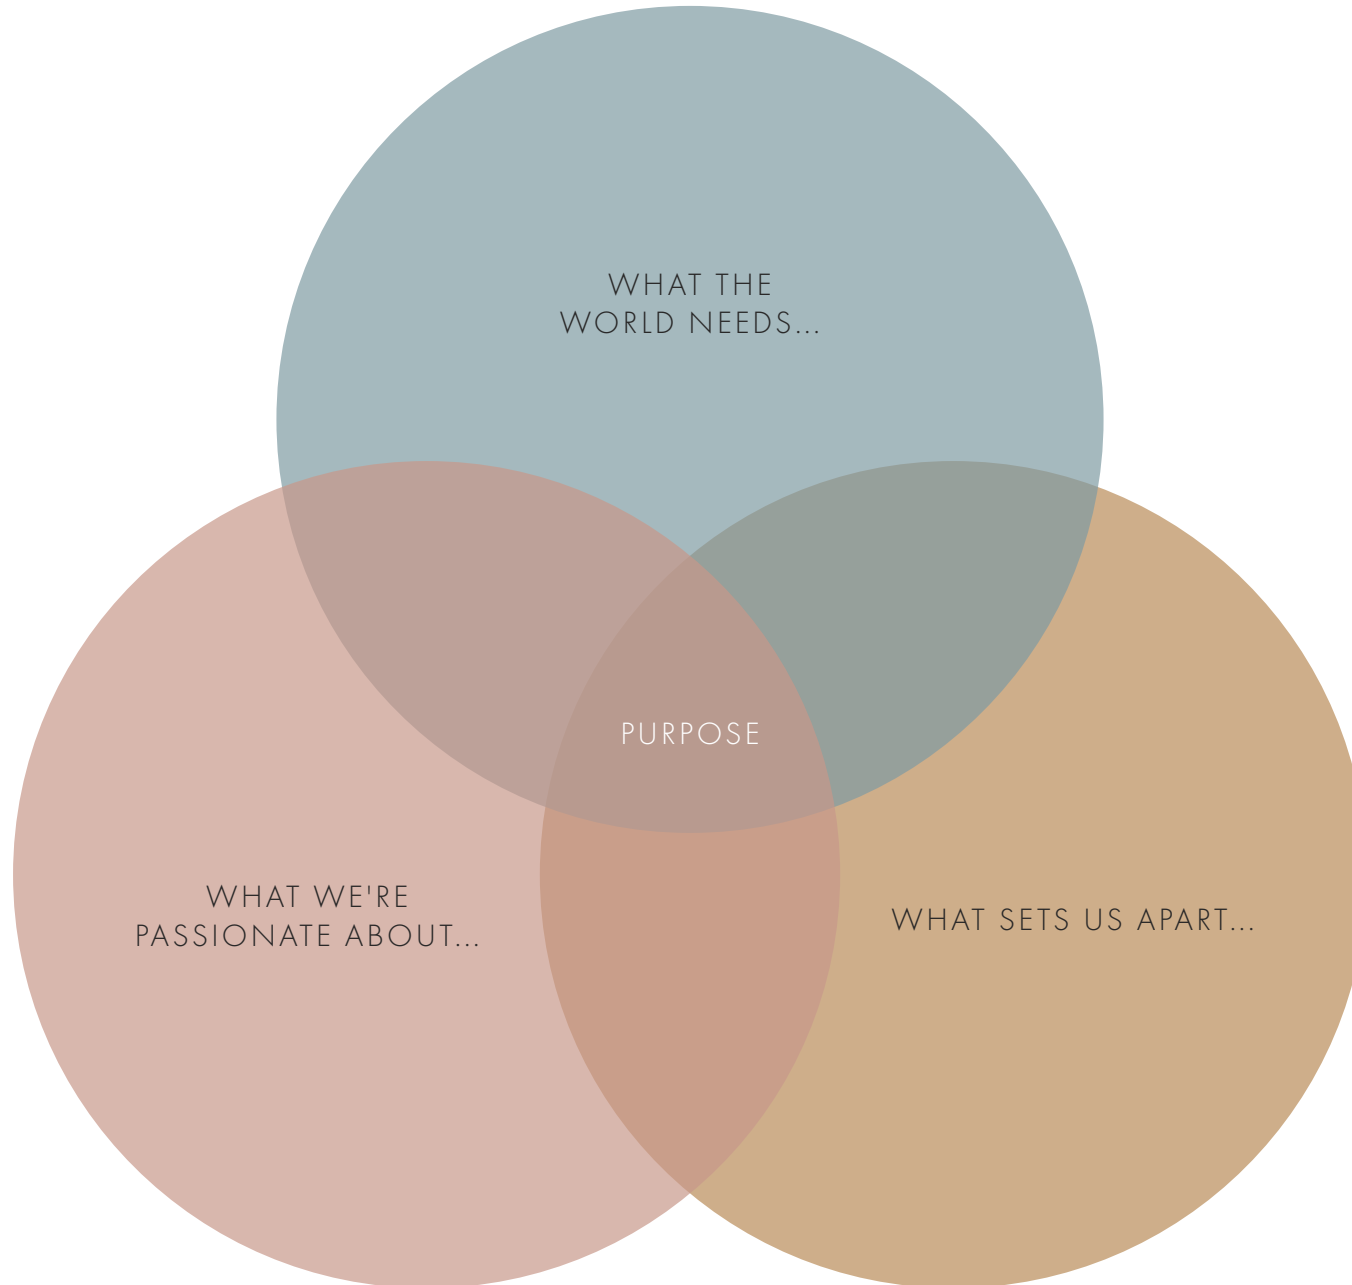

Our passion for performance, functionality and design has inspired us to reinvent the conventional loudspeaker with a fresh, modern look.

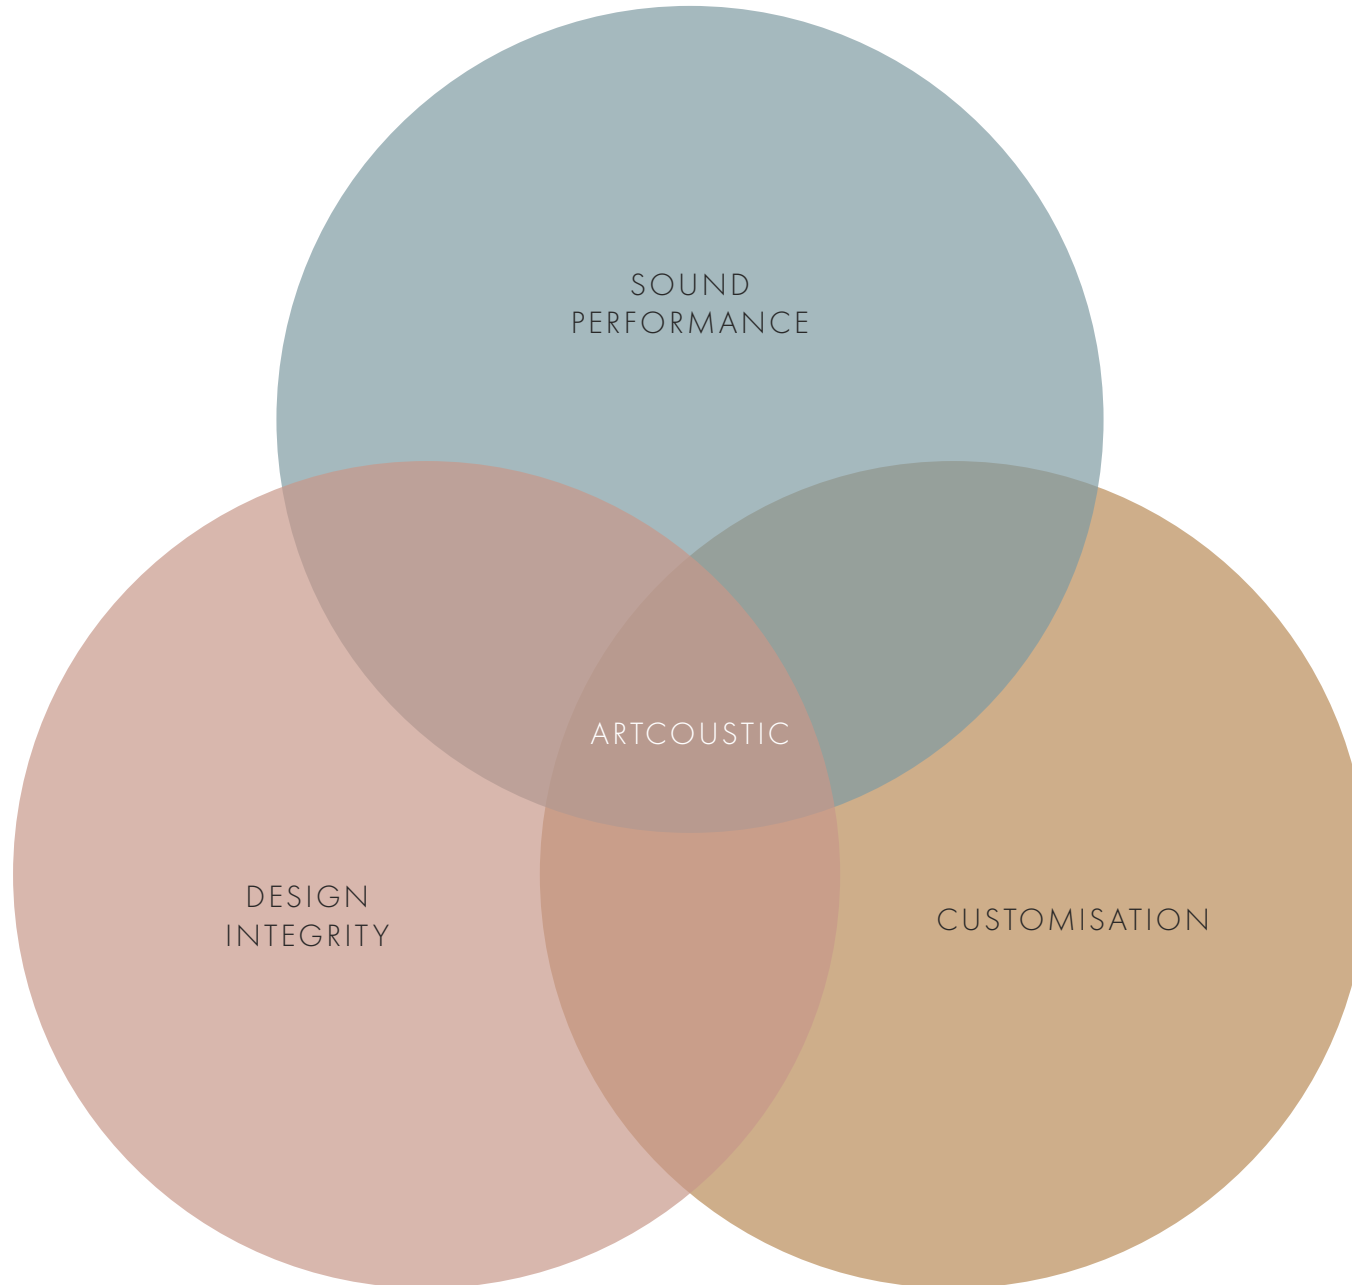

Our roots go back to original Danish loudspeaker design, associated with refined aesthetics and innovative design.

After years of combined design & technical development, we have created a loudspeaker, which looks as good as it sounds, without compromising one to the other.

"Our aim has always been to create a high-quality, honest and true sound whilst still achieving the aesthetic look of our products"

SOUND
PERFORMANCE

ARTCOUSTIC

CUSTOMISATION

DESIGN
INTEGRITY

SOUND PERFORMANCE

- Studio-quality sound, true to its origin
- Honest, pure, open, dynamic and accurate
- A full dynamic range with high sensitivity that delivers a more nuanced sound
- A rare hybrid between HiFi and PA systems, to give all the details and layers of sound

LIFE-LONG INVESTMENT

- Artcoustic products are a life-time investment, to be handed down from generation to generation
- A sustainable investment due to the absence of electronics
- Artcoustic will never become outdated

DESIGN INTEGRITY

- High-quality components from renowned Danish supplier
- Slimline format, under 7cm in depth, to discreetly blend into the interior
- Minimalistic in style, clean cut lines, and an architectural aesthetic
- Hand-crafted by skilled craftsmen

EASY INTEGRATION

- Wall-mounted or in-ceiling, all our speakers are made to take up as little space as possible
- Behind screen installation for dedicated cinemas means they are out of sight altogether

CUSTOMISATION

- Unlimited choice of colours for the cabinet of speaker in silk, gloss or piano lacquered finish
- Interchangeable screens can be matched to the speaker to create a subtle finish, complementing the interior
- Make a statement with your sound by adding a digitally printed graphic or artwork, either from our gallery or your own designs

MODULAR FORMAT

- Our flexible modular format, means we can create a speaker for any application
- From small rooms to large scale commercial cinemas, each system is designed to fit the interior space
- Always ensuring the quality and tonality of the sound output remains the same, whatever the size of room or commercial space

SOUND PERFORMANCE

"We guarantee the very best performance, just as the film director intended."

SOUND PERFORMANCE

- Studio-quality sound just as the director/artist intended it to sound - true to its origin
- Honest, pure open, dynamic, accurate
- High sensitivity delivers more nuances of sound and a full dynamic range - industry leaders in SPL per watt
- A rare hybrid between HiFi and pro, enjoy all the layers and details
- All array speakers can be powered by any high-end receiver, no additional power amplifiers required

SOUND PERFORMANCE

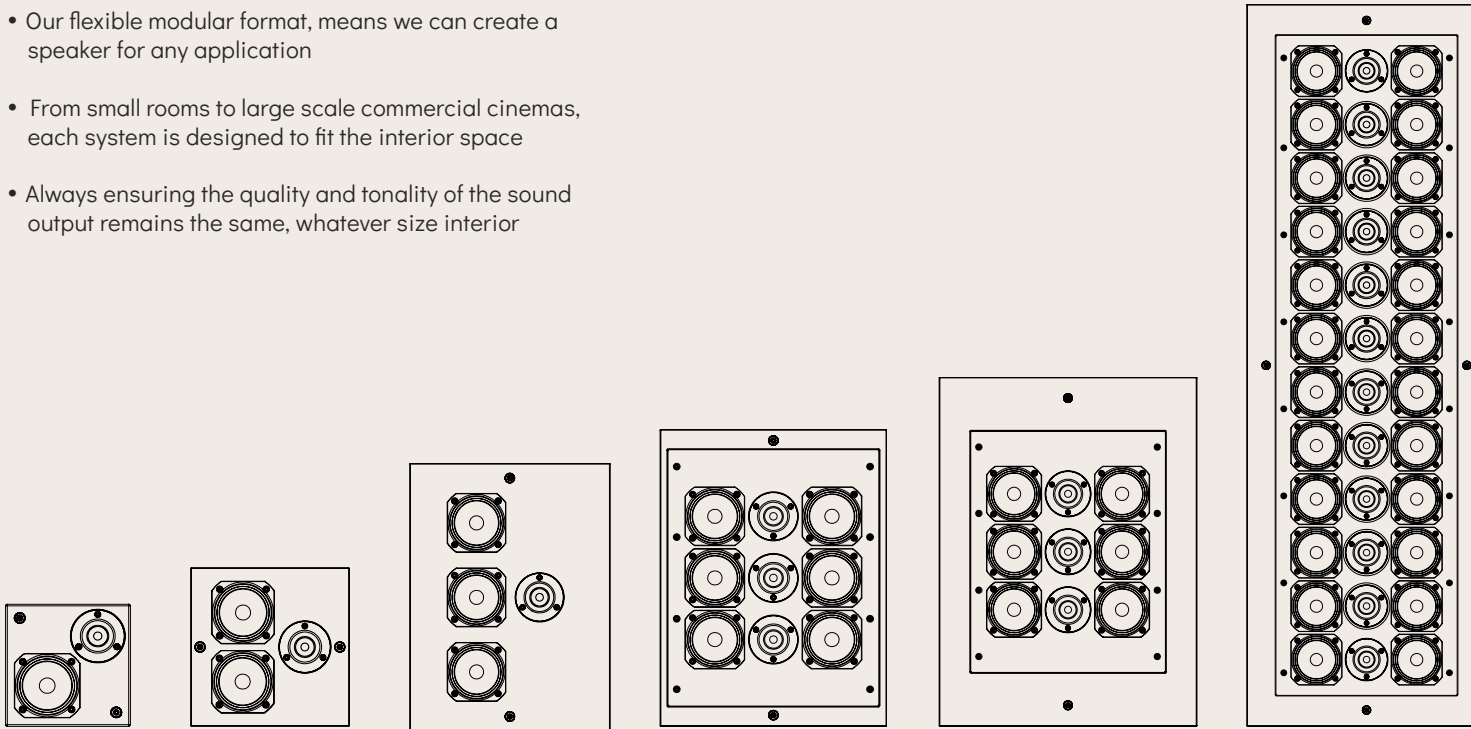

ARTICOUSTIC BRAND PRESENTATION

A MODULAR FORMAT

– A SPEAKER FOR EVERY APPLICATION

- Our flexible modular format, means we can create a speaker for any application
- From small rooms to large scale commercial cinemas, each system is designed to fit the interior space

Choose from an almost unlimited selection of colours, from NCS, RAL, or any major paint brand to match the interior.

CUSTOMISATION

DESIGN INTEGRITY

*"To create outstanding loudspeakers,
you need incredible components,
great workmanship and intricate
attention to detail."*

DESIGN INTEGRITY

- Authentic Danish loudspeaker design
- Ultra slim format – discreet to blend into any environment
- Lightweight & easy to install
- Top quality components
- Handmade craftsmanship
- Fits discreetly behind any cinema screen

MADE BY HAND

"Each unit is painstakingly constructed by hand – no manufacturing line, no robots. Merely a team of dedicated craftsmen putting the speakers together with care, attention, passion and pride."
